

# KEK group in the Belle upgrade

2008.7.3

Shoji Uno

KEK

# Person power in KEK

- People outside KEK have increased dramatically as compared with beginning of Belle construction stage.
  - Now, ~400 people in total
- Unfortunately, Belle members in KEK have decreased year by year.
  - Now, ~18 + a few posdocs + a few students
- Then, **people outside KEK can do good jobs for the construction of super Belle.**

# Responsibility for KEK group

- It is better for KEK people to concentrate on some parts of super Belle detector.
  - Infrastructure
    - Belle solenoid magnet and the cryogenic system
    - Structure
    - DAQ
    - Computing in KEK
  - Selected two sub-detectors, not all sub-detectors
    - Construction and also maintenance during data taking
    - Some KEK stuffs may move to different sub-group from the present working group.
